

ALUME CHANNELS™

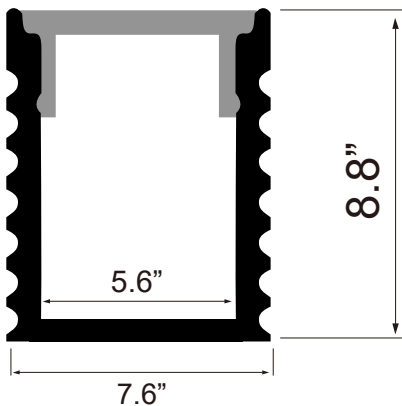

SERIES 130

Series 130 linear channel is specifically designed to house and enhance the functionality of our L4COB4M LED tape light. It provides a sleek and streamlined solution for seamlessly integrating the LED tape into various environments. The channel itself measures .30" in width, allowing for a snug fit that ensures stability and protection for the LED tape. Crafted from durable materials, the channel offers excellent heat dissipation and robustness, guaranteeing the longevity of the LED tape. Its slim profile and clean design make it ideal for discreet installations in a wide range of applications, including architectural, residential, or commercial settings. The channel effectively conceals the LED tape, providing a professional and polished appearance, while also serving as a safeguard against potential damage.
